DETAILED ACTION

Response to Arguments

1. Applicant's arguments **in the appeal brief** see pages 6-16, filed 8/19/09, with respect to claims 1-9, 11-13, 15-17, 19-21 and 23-29 have been fully considered and are persuasive. The rejections of claims 1-9, 11-13, 15-17, 19-21 and 23-29 has been withdrawn.

Allowable Subject Matter

2. Claims 1-9, 11-13, 15-17, 19-21 and 23-29 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claims 1-9, 11-13, 15-17, 19-21 and 23-29 are allowable over prior art since none of the prior art taken individually or in combination fails to particularly disclose, fairly suggests, or render obvious as argued by the applicant which examiner considers as persuasive as set forth above.

Claim 9 is also allowable over U.S.C 101 under In Re Bilski 88 USPQ2d 1385, since the method claim recites "*re-routing traffic from the primary path associated with an original IP address to an alternate path which includes a source device using a forwarding table that include IP and MPLS routing information*". Note that this specific method must inherently perform by a specific computer apparatus such a CPU or processor that performs "*re-routing traffic from the primary path associated with an original IP address to an alternate path which includes a source device using a forwarding table that include IP and MPLS routing information*", which is a specific tie-to structure apparatus. Thus it is clear that the claim recites a series of step or acts to be performed, a statutory process under 35 U.S.C 101 is tied to another

statutory category (i.e. a specific computer apparatus). Thus, claim 9 is statutory under 35 U.S.C. 101.

Claim 13 is allowable over U.S.C 101 under In Re Bilski 88 USPQ2d 1385, since the method claim recites “*re-routing traffic from the primary path associated with an original IP address to an alternate path using a forwarding table that include IP and MPLS routing information and the alternate path comprising devices*”. Note that this specific method must inherently perform by a specific computer apparatus such a CPU or processor that performs “*re-routing traffic from the primary path associated with an original IP address to an alternate path using a forwarding table that include IP and MPLS routing information and the alternate path comprising devices*”, which is a specific tie-to structure apparatus. Thus it is clear that the claim recites a series of step or acts to be performed, a statutory process under 35 U.S.C 101 is tied to another statutory category (i.e. a specific computer apparatus). Thus, claim 13 is statutory under 35 U.S.C. 101.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
